

Day 2

[ClickTrackProfit](#)

In today's habit, we're going to dive into Twitter!

Now what's cool about this lesson, you can use this on Noise.Cash as well, which we recommend and introduce to you in later CTP lessons.

But we're going to do something different in this lesson and include a hashtag into the mix....

We talk about adding #ClickTrackProfit into your first Tweets but now we'll use the hashtag #3StepsNoExcuses as well.

This is VERY important for us to keep track of your results throughout the challenge, so be sure to start engaging even if it's just with us at CTP today ;)

When you have completed this task: _____ Check it off!

[ListNerds](#)

We're diving into 'Mailing History' now...

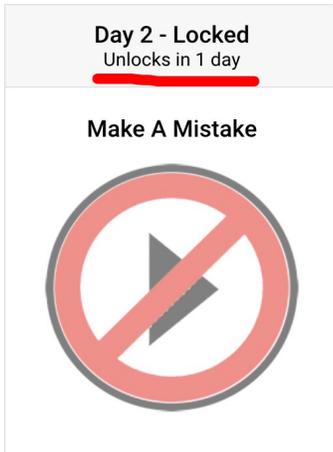

This will be what we will be paying close attention to throughout the month!

The day of the week we sent email, what our subject lines where....But also, how many emails we sent, how many were opened and what the click through rate was for each day.

As we progress, and continue to practice emailing ListNerds....We'll see what works, and what day of the week gets you the best results!

When you have completed this task: _____ Check it off!

Plus1Success

Did you notice something? Was Day 2 locked? That's because you didn't wait a full day before trying to do the task ;)

Remember, we're trying to build habits for an entire month...Not just rush through things.

If the lesson is unlocked, you'll learn about making mistakes and being O.K. With them!!

Don't be afraid to try things...Even if it fails or you make a mistake!

When you have completed this task: _____ Check it off!

That's Day 2

So now, get out there, tell the world you have completed day one and use that hashtag to bring others to the challenge :)

#3StepsNoExcuses
