

**PASSIVE
INCOME IN 2021
WITH CRYPTO!**

Passive income!

The dreams of so many online....Yet for the first time in history, we can build lucrative compounding revenue streams...That are 100% passive and best of all...Require no out of pocket expense!

Too good to be true?

Let's do some homework :)

First, you need to create streams of income coming into your wallets, and we do this by:

Creating & Engaging!

This takes time, so while it's 100% free to earn on the platforms we'll discuss...It does take time. But it's worth it :)

Think of this as the fuel that will get your passive income machine up and running!

We will be creating and engaging every single day on the following blockchains and crypto currency projects :

- [CTPtalk](#)
- [LeoFinance](#)
- [Hive](#)
- [Torum](#)
- [Noise.Cash](#)

Now each of these are unique, and you should only create relevant content! Plugging into these communities, creating valuable content in the form of blog posts and COMMENTS....will start to earn you crypto currency on multiple fronts.

By being active in each of these platforms we will be earning the following crypto:

- **CTP** Token
- **LEO** Token
- **HIVE** Token
- **XTM** Token (for down the road use case)
- **Bitcoin Cash**
- **Bitcoin**

Here's where it gets really exciting....Now we are going to build passive streams of income using the revenue we will be generating every single day inside of these platforms and projects....

Building Passive Income Streams

Step 1 Curation with CTP, LEO and HIVE – What is so unique about these projects is that you can take part and benefit from the inflation that is built into the blockchain.

And when you 'like' other people's content on Leo, CTP and Hive...You earn curation rewards! You can maximize and 'game' this to earn up to *15-20%* on strategic curation...However I would expect between **7-15%** on everything you 'like'.

Which means you will be earning income, just from liking other people's stuff!

This adds up quickly, the more active you are on each platform and community!

Step 2 Building Income With Hive-Engine Tokens – After we have built up a steady stream of income from creating, engaging and then curating...We will take some of the earnings and tap into the 'Income Tokens' on [Hive-Engine](#):

1. INDEX Token (*Ticker: INDEX*) - This project aims to 'index' the entire Hive-Engine market. And while doing so, pays out 80% of all curation and income generated by the token every single day. That's right. You buy INDEX and let it grow! This will pay you in various tokens (including BRO, CTP and LEO) every single day that you hold INDEX in your wallet.
2. BRO Token (*Ticker: BRO*) - Arguably one of the most successful income tokens and one of the first on Hive-Engine. Another daily payout token that pays you in various projects on Hive-Engine without you having to do a thing. Buy it, and let it do its thing.
3. UTOPIS (*Ticker: UTOPIS*) - Tap into the awesome world of Ethereum mining with this unique project. Holders of UTOPIS get weekly revenue shares from Ethereum mining in the form of HIVE token payouts. Here's how you get into the lucrative world of mining, without the thousands of dollars required in hardware!

Note: If this is all new to you make sure you check out TheHiveGuide.com for step by step instructions on how to get started with Hive.

**And a [quick reference post](#) to bringing fiat currency over to Hive Engine if you ever need it!*

Step 3 Passive Daily Income With Crypto Lending – We're about to enter the crazy world of DeFi without all the complicated 'MetaMask and TrustWallets'! Did you know, major corporations will PAY you to loan them your crypto?

There are multiple platforms that pay you every single day or week for simply, storing your crypto with them. We take the Bitcoin Cash we earn from places like Noise.Cash / Freebitcoin and stick it into Nexo / Celsius for daily returns!

Nexo – Earn up to 12% APY on all your crypto currency! Whether it's BTC or USDC, simply deposit your tokens and earn passive....Every single day!

Celsius – Another popular lending platform that pays every single week! Many more choices than Nexo for what tokens you can earn from. And easy to use, right from your phone!

Bonus #1: FreeBitcoin! Over 4% APY

Everyone knows about the popular Bitcoin faucet – [Freebitcoin!](#)

ANNUAL INTEREST RATE

4.08%

But did you know, once you hit 30,000 satoshis they will actually PAY you 4% a year which is compounded daily in your wallet. Without you having to do a thing....Cool huh?

Bonus #2: CUB Finance For The Win-win-win

While this step is a little bit more complicated than just sticking your crypto into Nexo or Celsius, it's still a fantastic way to flip some of your earning from Hive Engine into a project that (*at the time of this writing*) is paying out 200%...

Welcome to *the iNsAnE world* of decentralized finance and more specifically CUBdefi.com

This project is run by the same guys that own LeoFinance.io and have had years to learn the ropes and strategies to give their members big returns by simply....Providing liquidity to their decentralized exchange.

This takes a little bit of know how, including how to set up a Metamask wallet and funding it with some Binance tokens...But once you get set up....Simply buy your CUB tokens from the exchange and add it to the CUB den....

Here's why:

Conclusion:

As you can see...All you need to 'get in the game' and start building passive income in 2021 is....To get off the sidelines and get active!!

Not a SINGLE penny needs to be spent, but it does take time and effort. Not to worry, we're here with you every step of the way. If you have any questions about these strategies, reach out to us on:
